Biochar for environmental management : science, technology ...

"Biochar is the carbon-rich product when biomass (such as wood, manure, or crop residues) is heated in a closed container with little or no available air. It can be used to improve agriculture and the environment in several ways, and its stability in soil and superior nutrient-retention properties make it an ideal soil amendment to increase crop yields.

Biochar for Environmental Management: Science and ...

Biochar is a professional academic journal covering multidisciplines such as agronomy, environmental science, and materials science. It publishes innovative scientific papers on biochar preparation, soil improvement, greenhouse gas emissions, contaminated-environment remediation and water purification, etc.
