Volume 3, No. 3, Art. 16 - September 2002 . Subjectivity and Objectivity in Qualitative Methodology. Carl Ratner. Abstract: This article argues that subjective processes, social relations, and artifacts (including research instruments and methods) enable researchers to objectively comprehend psychological phenomena. This position opposes the postmodernist contention that subjective processes ...

Forensic psychologists offer their professional expertise to aid the judicial system in both civil and criminal matters. Since the psychological assessment of those involved in the legal system is the primary concern of forensic psychologists, it's incredibly important for those in the field to possess strong clinical skills.

Forensic Psychologist

As noted in the introduction, there is an imbalance between the number of quantitative and qualitative studies published in high quality journals (Avenier & Thomas, 2015), and specifically in Computers & Education (Pérez-Sanagustín et al., 2017). Notwithstanding concerns about the extent to which one set of criteria can adequately cover the range of different qualitative methodologies ...

The transtheoretical model of behavior change is an integrative theory of therapy that assesses an individual's readiness to act on a new healthier behavior, and provides strategies, or processes of change to guide the individual. The model is composed of constructs such as: stages of change, processes of change, levels of change, self-efficacy, and decisional balance.

1. Introduction and background. Patients with chronic conditions have complex bio-psychosocial needs and require access to multiple healthcare providers across several sectors during the course of an illness (Barnett et al., 2012). Due to the complexities of the healthcare system, care for these patients can often be fragmented and poorly coordinated, leading to unmet care needs and delayed ...
