An engineered wood joist, more commonly known as an I-joist, is a product designed to eliminate problems that occur with conventional wood joists. Invented in 1969, the I-joist is an engineered wood product that has great strength in relation to its size and weight. The biggest notable difference from dimensional lumber is that the I-joist carries heavy loads with less lumber than a dimensional ...

A cornice (from the Italian cornice meaning "ledge") is generally any horizontal decorative molding that crowns a building or furniture element - the cornice over a door or window, for instance, or the cornice around the top edge of a pedestal or along the top of an interior wall. A simple cornice may be formed just with a crown. The function of the projecting cornice of a building is to ...

Predictable Outcomes are the holy grail of the design and construction industry. To be able to determine, in the project planning stages, exactly where you wish to complete a project with regards to quality, schedule, and cost, then to be able to drive to those specific goals without fail should be a minimum level of performance for any industry.

The British Airways i360 Viewing Tower at Brighton is 162m high and only 3.9m in diameter - it is the world's tallest moving observation tower and was officially recognised as the "World's most slender tower" by Guinness World Records. It was completed in early August 2016 and has already carried almost 1 million passengers.

Glossary of Common House Parts. Because we have found the the page top sketch (US Commerce Department Phelan 1931 cited at REFERENCES) published in several forms with and without a consistent key to the numbered house parts or even consistent numbers, we have made up our own glossary list keyed to that sketch - below.. Phelan's 1931 drawing is shown here.
