Food and Beverage Ingredient Supplier | DMH Ingredients

Components which (irrespective of their relative quantity) do not help directly in achieving a product's performance objectives. They may, however, facilitate acceptance, application, stability, handling or marketing of the product, or delivery of the active ingredients. Not all inert ingredients are safe and, in some cases, are more dangerous than the active ingredients.

What are inactive ingredients? definition and meaning ...

Components of a chemical product which (irrespective of their relative quantity) help directly in achieving its performance objectives. In an insecticide spray, for example, the active ingredients typically constitute only 0.75 percent by weight of the entire product, 99.25 percent being the inactive or inert ingredients (such as the fragrance, propellant, and solvent).

What are active ingredients? definition and meaning ...

Every relationship has a beginning. And it's in that time that you set the mood for the rest of the relationship. I'm not talking about the first date, or even the third or fifth. I'm talking about once
