Topology Munkres Solutions

The term "homology group" usually means a singular homology group, which is an Abelian group which partially counts the number of holes in a topological space. In particular, singular homology groups form a measure of the hole structure of a space, but they are one particular measure and they don't always pick up everything. In addition, there are "generalized homology groups" which are not ...

Homology Group -- from Wolfram MathWorld

Betti Number. Betti numbers are topological objects which were proved to be invariants by Poincaré, and used by him to extend the polyhedral formula to higher dimensional spaces. Informally, the Betti number is the maximum number of cuts that can be made without dividing a surface into two separate pieces (Gardner 1984, pp. 9-10).

Geometry (from the Ancient Greek: γεωμετρία; geo-"earth", -metron "measurement") is a branch of mathematics concerned with questions of shape, size, relative position of figures, and the properties of space. A mathematician who works in the field of geometry is called a geometer.. Geometry arose independently in a number of early cultures as a practical way for dealing with lengths ...

M301 Syllabus. COLLEGE ALGEBRA Prerequisite and degree relevance: May not be included in the major requirement for the Bachelor of Arts or Sciences degree with a major in mathematics. In some colleges M301 cannot be counted toward the Area C requirement or toward the total hours required for a degree.

Course Syllabi - ma.utexas.edu

I create most of the animations programmatically, using a python library named "manim" that I've been building up. I've also used Grapher for a number of 3d animations. Everything is open-source on github, and a small community has emerged of people who use it, but before you dive in I feel like a warning is in order.

FAQ/Contact — 3Blue1Brown

In geometry, a coordinate system is a system that uses one or more numbers, or coordinates, to uniquely determine the position of the points or other geometric elements on a manifold such as Euclidean space. The order of the coordinates is significant, and they are sometimes identified by their position in an ordered tuple and sometimes by a letter, as in "the x-coordinate".
